

**Maximum
performance even in
the toughest
applications**

Quickly adjust the humidity levels to the desired by heating the room.

The PDD 85200 Famous dehumidifier is specially designed to operate in the most demanding conditions with maximum efficiency. You will not worry if your home or workshop is adequately heated or if the relative humidity levels are too high. The PDD 85200 will remove moisture very easily and quickly.

At Puredryhellas we design innovative functions and capabilities every day, giving more importance to the quality of construction and performance. That is why our customers are our source of inspiration.

The Puredry PDD 85200 Famous desiccant dehumidifier takes advantage of the latest Japanese dehumidification technology, with advanced software.

Desiccant dehumidification technology

Thanks to its desiccant dehumidification technology, the PDD 85200 Famous dehumidifier always has maximum efficiency even in the most difficult and demanding conditions.

It works efficiently in temperatures from 1-37 ° C, it is ideal for permanent residences that are not sufficiently heated and have for a long time temperatures below 15 ° C or are heated at intervals during the day, for caravans, boats, garages, workshops, etc.

Laundry Drying Function

You will no longer be bothered by the weather outside the house if the relative humidity levels are high or even the temperature is low. With the PDD 85200 Famous dehumidifier, the drying process is very easy and fast. All you have to do is spread out the wet clothes and close the door of the room.

This function will impress you both with its immediate and drastic results and with its extremely low operating costs, ensuring dry and fragrant clothes in the most economical way. Ideal for every housewife who wants to save time and give the feeling of freshness to her clothes again.
